

# Cheryl Montgomery

I've been a professional web developer for more than a decade. I built my first website in 1998, but didn't become a true professional until July 2006, when I learned proper web development by creating pixel-perfect sites on IE6 and Firefox. I'm a full-stack LAMP developer with more than a hundred websites under my belt. Building websites is my dream job.

## EXPERIENCE

### **FIRESTARTER SEO, Denver, CO**

#### *Web Director*

MAY 2021 - SEPT 2021

I was hired full-time by a long-term professional contact for whom I've done a lot of contract work over the last several years. The company provides mainly SEO and relied heavily on outsourcing for new websites and web-related projects or troubleshooting. I was hired to take over all website and coding needs, manage any outsourcing, create processes for new websites, and assist in planning for the future of the company.

### **OOZLE MEDIA, Sandy, UT**

#### *Website Product Manager/Web Director*

JAN 2018 - MAY 2021

In addition to continuing the below responsibilities, I became the manager for the web team as well as web director. I established processes and wrote documentation and public-facing content. I refined our themes and strived to keep up with industry changes.

#### *Lead Developer*

FEB 2013 - JAN 2018

I began to create custom-built themes and plugins that could be re-used in the future by other developers. I changed company focus to more client-friendly sites, and I began training clients on using their new sites. I was responsible for our server admin, as well as email admin, tech support, and DNS issues. I worked with our new CRO team to apply changes to design and themes. I did a lot of troubleshooting of PHP, JavaScript, SSL, and hosting issues on client sites.

#### *Web Developer*

DEC 2010 - FEB 2013

I was hired at Oozle to build sites and see them from PSD to launch, using WordPress as a CMS. I set up CRM integration via proprietary APIs for education clients. I was also responsible for troubleshooting, maintaining, and changing existing client sites, as well as creating landing pages.

## CONTACT INFO

Eagle Mountain, UT 84005

(801) 864-3928

[cheryl@uintalabs.com](mailto:cheryl@uintalabs.com)
